**TABLE 1:** The number of students who are in each lecture, lab, and the dropout rates for the past 11 semesters<sup>2</sup>. The dropout rate is an estimated guess based on each semester; it is calculated by adding an extra 15 students in each lecture before the semester starts and subtracting the number of students that are left by the end of the semester.

<sup>1</sup>  The dropout rate for these courses are negative. More students complete these classes than the maximum seats available.
